Recommended Action

Option 1:

That the Water and Wastewater Committee recommend to Council to approve the Water and Wastewater Committee 2026 - 2027 Working Plan as presented.

Previous Council / Committee Action

The Water and Wastewater Committee was established by Bylaw #3202 - Water and Wastewater Committee Bylaw to research and provide Council with recommendations for water and wastewater infrastructure fiscal planning..

As per Bylaw #3202 the Committee will present to Council the 2026 – 2027 Work Plan for review.

Background and Analysis

Administration will present the 2026 - 2027 Working Plan to the Water and Wastewater Committee for consideration. The working plan outlined includes finalizing the utility customer review, installation of meters for non-residential facilities, and implementation of usage-based sewer fees. Pending the approval of the working plan, Administration would bring forward a 2027 Business Case with the costs related to the installation of meters.

2026/2027 Working Plan

Water and Wastewater Committee
June 30, 2026

Where We Are Currently and Where Do We Want to Go?

- The County implemented fixed uniform water and sewer rates for residential and commercial users for the 2026 calendar year.
- Hamlets of Bezanson, Teepee, and La Glace are metered for those on the County's water service. The metering in Hythe was recently completed with a handful of meters outstanding till the 2028 year.
- Based on what we have learned to date we have developed a work plan

2026 Tasks to Date

1. Draft a Water and Wastewater Rate Setting Policy based on target of 25% recovery of operational costs – water (\$100/month residential) and 75% recovery of operational costs – sewer (\$75/month residential).
CM#20251006.009
2. Administration to bring back information on the commercial and institutional rates with the 4-year rate setting policy.
WWC#20260324.007

Challenge #1

At the beginning of 2026, Administration identified a handful of variances with utility customer accounts. In June, a review was conducted to validate billing categories and rates on properties.

Findings reveal inconsistent billings based on the five user fee categories on the Schedule of Fees, Rates, and Charges.

Challenge #2

Hythe commercial sewer rates were divided into three levels. The levels were unchanged upon the amalgamation. Further investigation reveals the levels were based on number of employees for commercial customers.

Currently, the County does not have a criteria for assigning commercial customer levels. Review indicates buildings of similar use and sizes being charged inconsistent rates.

Challenge #3

Each of the County hamlets are unique for utility services. Hamlets have varying water and sewer services. The number of water meters does not match the number of sewer residents.

Ex: Valhalla is purely sewer customers; La Glace and Hythe have more sewer connections than water connections

Proposed Working Plan

1. Complete review of customer accounts and update
2. Installation of meters for multi-residential and non-residential customers
3. Implementation of usage-based sewer fees

Proposed Working Plan

1. Complete review of customer accounts and update
 - Better understanding of all our customers and rate types being applied
 - Update data for discrepancies

Proposed Working Plan

2. Installation of meters for multi-unit residential and non-residential customers

- Investment from the County required (2027 Business Case)
- Specific customers only (commercial, schools, non-for-profits, hotel/motels, and multi-residential units (5+ units))
- Provides the County with the ability for consistent billing process for sewage among properties

Proposed Working Plan

3. Implementation of usage-based sewer fees

- Solve the inconsistencies in billing for commercial and large multi-residential buildings in Hythe
- Simplify the County's billing
- 4-Year Rate Setting Policy would be delayed

Discussion Points

Committee support on the proposed working plan

Framework suggestions from Committee

- Metering the non-for-profits would include Ag Societies, churches, etc.

Further items the Committee would like brought forth
