13. Administrator’s Update
14. Convene into Closed Session pursuant to Wis. Stat. Section 19.85(1)(e) “Deliberating or negotiating the purchasing of public properties, the investing of public funds, or conducting other specified public business, whenever competitive or bargaining reasons require a closed session.” for the purpose of discussing Village of Whiting Building Inspection Services Contract.
15. Adjournment subject to call of the chair

Village Board Meeting

Wednesday, May 6, 2026

6:00 p.m.

Members Present: Gary Wolf, Steve Fritz, Ross Ballard, Tim Durigan, Al Tessmann, Adam Raabe, Al Haga

Others Present: Steve Kunst, Julia Mann, Tammy Wojtalewicz, Scott Klemm, Matt Saloun, Adam DeKleyn, Joe Terry

1. Mr. Wolf called the meeting to order at 6:00 p.m. Pledge of Allegiance.
2. MINUTES  
**Mr. Raabe motioned, and Mr. Durigan seconded, to approve the minutes of the meeting of April 15, 2026, as printed. Motion carried.**
3. PERSONS WISHING TO ADDRESS THE BOARD  
Mr. Wolf acknowledged Adam Lutz in the audience. Adam introduced himself to the board. He is from Scout Troop 289 and is working on his Communications Merit Badge.
4. CORRESPONDENCE - None.
5. APPROVAL OF VOUCHERS  
**Mr. Raabe motioned, and Mr. Tessmann seconded, to approve the vouchers as listed. Motion carried.**
6. ORDINANCE NO. 5-8-26 REZONING REQUEST – ERIC AND EMILY KRUG – REZONE FROM STANDARD SINGLE-FAMILY RESIDENTIAL DISTRICT (R-2) TO THE COMPACT SINGLE-FAMILY RESIDENTIAL DISTRICT (R-3) – 1717 ROSE COURT (PIN: 173230815-13.06)

**Mr. Tessmann motioned, and Mr. Raabe seconded, to approve Ordinance No. 5-8-26 Rezoning Request – Eric and Emily Krug – Rezone from Standard Single-family Residential District (R-2) to the Compact Single-family Residential District (R-3) – 1717 Rose Court (PIN: 173230815-13.06). Motion carried.**

RESOLUTION NO. 5-8-26 – CERTIFIED SURVEY MAP (CSM) – ERIC AND EMILY KRUG – 2 LOTS – 1717 ROSE COURT (PIN: 173230815-13.06)

**Mr. Tessmann motioned, and Mr. Fritz seconded, to approve Resolution No. 5-8-26 – Certified Survey Map (CSM) – Eric and Emily Krug – 2 lots – 1717 Rose Court (PIN: 173230815-13.06). Motion carried by unanimous roll call vote.**

7. APPROVAL OF HOOVER AVE. PREVENTATIVE MAINTENANCE

Mr. Klemm stated this project was not originally planned for this year, but this winter has taken a toll on the road. We want to take steps now to save the road. Waiting would incur significantly more costs in the future. He gave an overview of the maintenance to be done on the road.

**Mr. Tessmann motioned, and Mr. Fritz seconded, to approve the Hoover Ave. preventative maintenance. Motion carried.**

8. APPROVAL OF EQUIPMENT PURCHASES FOR PUBLIC WORKS, WATER, AND WASTEWATER

Mr. Klemm reviewed the request. The manhole cutter would be a shared purchase to include Public Works, Water and Wastewater. It would help improve the life span of the manholes and saves on equipment such as the plows. He noted the current problems with the manholes.

Public Works has had a Brocce Broom on the replacement list for several years and has kept pushing it out. This broom purchase can be used on the same tractor the ditch mower is used making the tractor dual purpose. This broom is about 1/3 the cost of purchasing another Brocce Broom and is a savings over time as well. He noted the funds for these purchases out of Public Works come from proceeds of an auction they had.

**Mr. Haga motioned, and Mr. Durigan seconded, to approve the equipment purchases for Public Works, Water, and Wastewater. Motion carried.**

Mr. Wolf commended Mr. Klemm and his department for managing their funds and using the auction proceeds to do this.

9. POPPY DAY PROCLAMATION

Mr. Wolf gave an overview of the Poppy Day Proclamation.

**Mr. Tessmann motioned, and Mr. Fritz seconded, to approve the Poppy Day Proclamation. Motion carried.**

10. CLASS "B" FERMENTED MALT BEVERAGE RETAILERS LICENSE RENEWALS

Ms. Wojtalewicz reviewed the renewals for six month licenses.

**Mr. Haga motioned, and Mr. Tessmann seconded, to approve the Class "B" Fermented Malt Beverage Retailers License Renewals as listed. Motion carried.**

11. SHARED-RIDE TAXI QUARTERLY REPORT

Ms. Wojtalewicz reviewed the report.

12. VILLAGE PROJECT CHANGE ORDERS, SUBSTITUTIONS OR CONSTRUCTION APPROVALS

None.

13. ENGINEER'S REPORT

Mr. Terry reviewed his report highlighting the Green Tree Farm project and the Springville Dam. Copy attached.

14. ADMINISTRATOR'S UPDATE

Mr. DeKleyn updated the board regarding Olive Garden. Mr. DeKleyn noted the sale is set to close tomorrow with construction to begin on Monday. The project completion is anticipated for the end of 2026 or early 2027.

Mr. Klemm updated the board on the yard waste and brush pickups. Mr. Kunst thanked the Public Works department as well as the residents regarding the large quantity of brush for the pickup. The crew did a great job and the patience of residents was remarkable. He received a lot of positive feedback from residents on how the crews were handling it. Public Works did two rounds for the brush pick up. He also acknowledged Zblewski's and Green Thumb Landscaping for their assistance to the Village with these pickups. Mr. Haga commented the amount of brush was significant.

Mr. Kunst updated the board noting two food trucks are scheduled at Lake Pacawa Park, he anticipates site plans for the public safety buildings and bid plans will be coming to board at the next meeting, and interviews for Battalion Chief positions are complete. These are not newly funded positions. They are positions that were reworked into different positions. He noted PWYA will have their first tournament this weekend, so be cautious on Cedar Dr. and when out and about as there will be a lot of people in the area. Mr. Ballard added this is the biggest Early Bird Tournament ever with almost 80 teams.

15. ADJOURNMENT SUBJECT TO CALL OF THE CHAIR

**Mr. Tessmann motioned, and Mr. Raabe seconded, to adjourn at 6:25 p.m.**

Respectfully submitted by Tammy Wojtalewicz, Village Clerk

Report Criteria:

- Detail report.
- Invoices with totals above \$0.00 included.
- Paid and unpaid invoices included.

# VILLAGE OF PLOVER

2400 POST ROAD - PO Box 37 - PLOVER, WISCONSIN 54467  
[WWW.PLOVERWI.GOV](http://WWW.PLOVERWI.GOV)

**To:** Village Board Members

**From:** Tammy Wojtalewicz, Village Clerk

**CC:** Steve Kunst

**Date:** May 7, 2026

**Re:** Reserve Retail Liquor License – APPHOP PLOVER, Inc. DBA Applebee’s  
Neighborhood Bar and Grill + IHOP

---

This action is in consideration of a Reserve “Class B” Combination Alcohol Beverage Retail License for: APPHOP PLOVER, Inc., DBA Applebee’s Neighborhood Bar and Grill + IHOP. Their agent is Walter Salaverria.

This is the former Monk’s location at 1400 Commerce Place. Monk’s has relinquished their reserve license at this location.

The Village of Plover has a quota of 17 “Class B” retail liquor licenses, none of which are available. The Village has 11 “reserve” “Class B” licenses, three of which are used and have an initial fee of \$10,000.

**Re:** 2026-2027, Retail Liquor License Renewals

---

Following is a list of those applicants for Retail Alcohol Beverage Licenses renewals for the 2026-2027 licensing year. No retail fermented malt beverage may be issued to any applicant indebted for the purchase of beer in excess of 15 days and no retail intoxicating liquor license may be issued to any applicant indebted for the purchase of intoxicating liquor in excess of 30 days. As is required by State Statute, all renewal applications being acted on at this week's meetings have been published three consecutive times to allow wholesale distributors the opportunity to send a delinquency notice to this office. I haven't received any to date for the applicants below.

No retail "Class B" liquor license may be issued for a premise which does not meet the standards of the Department of Health and Social Services for restaurants. Therefore, a list of all "Class B" combination liquor license applicants has been sent to Portage County Health and Human Services who inspects the premises and lets me know if a local establishment does not meet standards.

2026-27 Retail Liquor License applicants are as follows:

Class "A" Fermented Malt Beverage Retailers License

1. Sole Proprietor Irma Hernandez-Smith, La Poblanita Mexican Grocery Store, 2541 Post Rd.

"Class A" Combination Retailers Liquor License

1. Agent Amratlal Zala, Dan's Liquor, 2622 Post Rd.
2. Agent Erika Hansford, Fuel On #52, 1011 Post Rd.

**STATE/MUNICIPAL  
FINANCIAL  
AGREEMENT**

Date: December 3, 2025  
 I.D.: 6414-01-04/74  
 Road Name: STH 54  
 Title: Plover - Waupaca  
 Limits: Maple Drive to I-39  
 County: Portage  
 Roadway Length: 1.73 Miles

The signatory **village of Plover** hereinafter called the Municipality, through its undersigned duly authorized officers or officials, hereby requests the State of Wisconsin Department of Transportation, hereinafter called the State, to initiate and affect the highway or street improvement hereinafter described.

The authority for the Municipality to enter into this agreement with the State is provided by Section 86.25(1), (2), and (3) of the Statutes.

**NEEDS AND ESTIMATE SUMMARY:**

**Existing Facility - Describe and give reason for request:** The existing pavement structure consists of asphalt overlaid with concrete. The concrete overlay on asphalt has resulted in an increased deterioration in the pavement, such as longitudinal and transverse cracking, spalling and shifting between the slabs.

**Proposed Improvement - Nature of work:** The proposed improvement is a pavement replacement. Work will consist of removing the concrete overlay and the asphalt underneath, adding base aggregate to the existing base layer, and new HMA asphalt replaced on top. The project will include the widening of paved shoulders, replacement of select culverts, replacement of guardrail, and the upgrade of pavement markings and centerline rumble strips. The project will also include sanitary sewer improvements as requested by the Municipality.

**Describe non-participating work included in the project and other work necessary to finish the project completely which will be undertaken independently by the municipality:** A nominal amount is included to cover items in paragraph 3 (to be adjusted in the final plans).

**TABLE 1: SUMMARY OF COSTS**

Phase	Total Est. Cost	Federal/State Funds	%	Municipal Funds	%
6414-01-04 Preliminary Engineering: Plan Development	\$ 310,300	\$ 310,300	100%	\$ -	0%
6414-01-74 <sup>1</sup> Construction:					
Roadway Items (cat 0010)	\$ 2,125,816	\$ 2,125,816	100%	\$ -	0%
Culvert Items C-49-0004 (cat 0020)	\$ 117,502	\$ 117,502	100%	\$ -	0%
Non-Participating Sanitary Items (cat 0030)	\$ 111,034	\$ -	0%	\$ 111,034	100%
subtotal 6414-01-74:	\$ 2,354,352	\$ 2,243,318		\$ 111,034	
<b>Total Cost Distribution</b>	<b>\$ 2,664,652</b>	<b>\$ 2,553,618</b>		<b>\$ 111,034</b>	

<sup>1</sup>Estimates include construction engineering

This request shall constitute agreement between the Municipality and the State; is subject to the terms and conditions that follow (pages 2 – 6); is made by the undersigned under proper authority to make such request for the designated Municipality, upon signature by the State, upon fully executed signature of applicable State Municipal Maintenance Agreement and delivery to the Municipality. The initiation and accomplishment of the improvement will be subject to the applicable federal and state regulations. No term or provision of neither the State/Municipal Financial Agreement nor any of its attachments may be changed, waived or terminated orally but only by an instrument in writing executed by both parties to the State/Municipal Financial Agreement.

**TERMS AND CONDITIONS:**

1. The Municipality shall pay to the State all costs incurred by the State in connection with the improvement which exceeds federal/state financing commitments or are ineligible for federal/state financing. Local participation shall be limited to the items and percentages set forth in the Summary of Costs table, which shows Municipal funding participation. In order to guarantee the Municipality’s foregoing agreements to pay the State, the Municipality, through its above duly authorized officers or officials, agrees and authorizes the State to set off and withhold the required reimbursement amount as determined by the State from General Transportation Aids or any moneys otherwise due and payable by the State to the Municipality.
2. Funding of each project phase is subject to inclusion in an approved program and per the State’s Facility Development Manual (FDM) standards. Federal aid and/or state transportation fund financing will be limited to participation in the costs of the following items as specified in the Summary of Costs:
  - (a) Design engineering and state review services.
  - (b) Real Estate necessitated for the improvement.
  - (c) Compensable utility adjustment and railroad force work necessitated for the project.
  - (d) The grading, base, pavement, curb and gutter, and structure costs to State standards, excluding the cost of parking areas.
  - (e) Storm sewer mains, culverts, laterals, manholes, inlets, catch basins, and connections for surface water drainage of the improvement; including replacement and/or adjustments of existing storm sewer manhole covers and inlet grates as needed.
  - (f) Construction engineering incidental to inspection and supervision of actual construction work, except for inspection, staking, and testing of sanitary sewer and water main.
  - (g) Signing and pavement marking necessitated for the safe and efficient flow of traffic, including detour routes.
  - (h) Replacement of existing sidewalks necessitated by construction and construction of new sidewalk at the time of construction. Sidewalk is considered to be new if it’s constructed in a location where it has not existed before.

- (i) Replacement of existing driveways, in kind, necessitated by the project.
  - (j) New installations or alteration resulting from roadway construction of standard State street lighting and traffic signals or devices. Alteration may include salvaging and replacement of existing components.
3. Work necessary to complete the improvement to be financed entirely by the Municipality or other utility or facility owner includes the following items:
- (a) New installations of or alteration of sanitary sewers and connections, water, gas, electric, telephone, telegraph, fire or police alarm facilities, parking meters, and similar utilities.
  - (b) New installation or alteration of signs not necessary for the safe and efficient flow of traffic.
  - (c) Roadway and bridge width in excess of standards.
  - (d) Construction inspection, staking, and material testing and acceptance for construction of sanitary sewer and water main.
  - (e) Provide complete plans, specifications, and estimates for sanitary sewer and water main work. The Municipality assumes full responsibility for the design, installation, inspection, testing, and operation of the sanitary sewer and water system. This relieves the State and all of its employees from the liability for all suits, actions, or claims resulting from the sanitary sewer and water system construction.
  - (f) Parking lane costs.
  - (g) Coordinate, clean up, and fund any hazardous materials encountered for Municipal utility construction. All hazardous material cleanup work shall be performed in accordance to state and federal regulations.
4. As the work progresses, the Municipality will be billed for work completed which is not chargeable to federal/state funds. Upon completion of the project, a final audit will be made to determine the final division of costs.
5. If the Municipality should withdraw the project, it shall reimburse the State for any costs incurred by the State in behalf of the project.
6. The work will be administered by the State and may include items not eligible for federal/state participation.
7. The Municipality shall, in cooperation with the State, assist with public relations for the project and announcements to the press and such outlets as would generally alert the affected property owners and the community of the nature, extent, and timing of the project and arrangements for handling traffic within and around the project.
8. Basis for local participation:
- (a) **Preliminary Engineering – 6414-01-04:** In accordance with the State's Local Cost Sharing Policy of the Program Management Manual, the State is responsible for 100% of all design engineering costs necessary for the state construction project. Additional design work, at the request of the Municipality, may require local participation.
  - (b) **Participating Construction – 6414-01-74:**
    1. Roadway Items (Cat 0010): In accordance with the State's Local Cost Sharing Policy of the Program Management Manual, the State is responsible for 100% of the costs necessitated by the roadway project (grading, paving, etc.) unless otherwise noted in the sections below.

Driveways: In accordance with the State's Local Cost Sharing Policy of the Program Management Manual, the State is responsible for 100% of replacement driveways necessitated by roadway

construction as follows: where there is no sidewalk, replacement in kind beyond the curb; where there is a sidewalk, concrete from curb to sidewalk and replacement in kind beyond the sidewalk. New driveways are not eligible for Federal/State funding.

Bicycle Accommodations: In accordance with the State's Local Cost Sharing Policy of the Program Management Manual, the State is responsible for 100% of the costs for bicycle accommodations, where recommended by the State's Facility's Development Manual.

Storm Sewers: In accordance with the State's Local Cost Sharing Policy of the Program Management Manual, the State is responsible for 100% of costs necessary to construct a storm sewer system that accommodates roadway drainage, and surface water naturally flowing to the state trunk highway. The Municipality is responsible for 100% of the cost to over-size the storm sewer system to accommodate all additional local storm water caused by existing or future developments, and the Municipality agrees to pay these costs.

Parking Policy: In accordance with State statute 86.32(4), the Municipality is required to pay the actual construction costs and any associated costs (if applicable) of that part of the state trunk highway on which parking is permitted. The local cost share is the amount of the total project cost that represents the construction cost of the parking lane(s).

Detour: In accordance with State statute 84.20 and 84.02(10) Wis. Stats., the State is responsible for 100% repair of any damage to any local road caused by its use as a detour designated by the department as the official detour route. Such highway or street shall also be maintained by the department during such use.

2. Culvert Items C-49-0004 (Cat 0020): In accordance with the State's Local Cost Sharing Policy of the Program Management Manual, the State is responsible for all costs associated with the usual items of roadway and structure construction (bridge replacement, grading, paving, etc.), which are an integral part of the construction project.
3. Non-Participating Sanitary Items (Cat 0030): In accordance with the State's Local Cost Sharing Policy of the Program Management Manual, the Municipality is responsible for 100% of all costs associated with Municipal owned utilities or appurtenances, including but not limited to, new installation or alteration of sanitary sewer and water, including service connections. The Municipality is also responsible for 100% of all costs caused by changes to Municipal owned utilities related to other utilities (gas, electric, telephone, fire, or police alarm facilities, parking meters, irrigation systems and similar utilities).

Hazmat: In accordance with the State's Local Cost Sharing Policy of the Program Management Manual, the Municipality agrees to pay 100% of the costs associated with excavating and transporting hazardous material for which the Municipality has been identified as the responsibly party. The Municipality is responsible for securing a suitable site to store the material.

Comments and Clarification: This agreement is an active agreement that may need to be amended as the project is designed. It is understood that these amendments may be needed as some issues have not been fully evaluated or resolved. The purpose of this agreement is to specify the local and state involvement in funding the project. A signed agreement is required before the State will prepare or participate in the preparation of detailed designs, acquire right-of-way, or participate in construction of a project that merits local involvement.

**VILLAGE OF PLOVER, WI  
STAFF REPORT  
VILLAGE BOARD**

**Submitted By:** Steve Kunst, Administrator  
**Date:** May 15, 2026  
**Subject:** Public Safety Facilities Bid Plans

---

**Background:** Since the Board was presented with the 60% design plans for the proposed Public Safety Facilities project earlier this Spring, SEH and Village staff have worked to finalize both building and site plans. Included in this packet are the prominent pages from the complete bid plan set for both the PD and FD portions of the project. Formal site plan review including parking, landscaping, exterior materials, dumpster enclosure, and stormwater management are being reviewed by the Plan Commission on Monday, May 18<sup>th</sup>. The request for the Board is to review the bid plans and approve them to go out to competitive bid.

**Anticipated Timeline:** Pending Village Board approval the plans will go out to bid almost immediately. Contractors would have approximately one month to prepare and submit their bids for review and consideration by the Village Board in July.

**Financial Considerations:** Bid plans and going out to bid are part of the existing contract with SEH. Approval of going out to bid does not bind the Village to completing the project. Acceptance of any bids would be considered at a future date.

Cost estimates provided by SEH show the entire project cost without contingency to be \$24.35 million in 2026 dollars. Of that the PD (without a firing range) is estimated at \$14.73 million, and the FD is estimated at \$9.6 million. SEH does recommend a contingency of approximately \$2.17 million for the project, bringing the total estimated budget for the base bid (firing range items being considered only as an alternate bid item) of the project to \$26.71 million.

**Recommendation:** Staff recommend approval of the proposed bid plans, as presented

**Attachments:** SEH Presentation  
Bid Plans

## Project List

### UPDATES TO COST ESTIMATES

- *December 2024 Estimated the project at \$24.1 Million in 2024 Dollars*
- *90% plan review and estimate projects the cost at \$26.5 in 2026 dollars- no significant change from 60%*
- *Inflation escalation of 5% per year calculates the project at \$27 Million*
- *Design refinement added items to the original program (underground stormwater detention)*
- *Alternates will be built in to give the Village flexibility*

Projects	Plan Issue	2025	2026	2027	2028	2029	Totals

- DIMENSIONS ARE TO FACE-OF-CURB OR EDGE-OF-PAVEMENT.
  - RADIUS DIMENSIONS ARE TO FACE-OF-CURB OR EDGE-OF-PAVEMENT.
  - CONTRACTOR SHALL PROVIDE A HEAVY DUTY CONCRETE PAVEMENT JOINTING FIBER FOR ENGINEER'S APPROVAL PRIOR TO CONSTRUCTION.
  - ALL CONSTRUCTION SHALL COMPLY WITH THE VILLAGE OF FLOVER CODE OF ORDINANCES.

**PARKING CALCULATIONS:**

SITE USES: GENERAL BUSINESS DISTRICT (B-2)

EXISTING GROSS FLOOR AREA OF EXISTING BUILDING = 33,659 SQUARE FEET

PROPOSED GROSS FLOOR AREA OF PROPOSED BUILDINGS = 71,449 SQUARE FEET

TOTAL EXISTING SITE PARKING STALLS = 91 SPACES

TOTAL PROPOSED SITE PARKING STALLS = 104 SPACES

REQUIRED HANDICAPPED ACCESSIBLE PARKING SPACES = 5 SPACES (MINIMUM NUMBER OF SPACES PERMITTED FOR PARKING LOTS WITH 101 TO 150 STALLS PER ADA.GOV)

EXISTING HANDICAPPED ACCESSIBLE PARKING SPACES = 4 SPACES

TOTAL EXISTING OFF SITE PARKING STALLS = 30 SPACES

TOTAL PROPOSED OFF SITE PARKING STALLS = 18 SPACES

## GENERAL LANDSCAPE NOTES

- Contractor responsible for contacting public and private underground utility locating service to have site marked prior to any digging or earthwork.
- Contractor to verify all plant quantities shown on plant list and verify with plan. Report any discrepancies immediately to general contractor.
- All plantings shall comply with standards as described in American Standard of Nursery Stock - ANSI Z60.1 (latest version). General contractor or owner's representative reserves the right to inspect and potentially reject any plants that are inferior, compromised, undersized, diseased, improperly transported, installed incorrectly or damaged.
- Any potential plant substitutions must be submitted in writing to the general contractor and approved by the owner's representative or landscape architect prior to installation. All plants must be installed as per sizes and quantities shown on plant material schedule, unless approved by the owner's representative or landscape architect. Any potential changes to sizes shown on plan and appropriate cost credits / adjustments must be submitted in writing to the general contractor and approved by the owner's representative or landscape architect prior to installation.
- The subsequent requirements regarding topsoil should be coordinated between the general contractor, grading contractor and landscape contractor.
- Subgrade areas shall be graded to within 1", more or less, of proposed subgrade. Deviations shall not be consistent in one direction.
- Topsoil shall be placed to meet proposed finished grade. Planting islands to be backfilled with clean topsoil free of debris (per note below) to a minimum depth of 18" by general / grading contractor to insure long term plant health. All other landscaped areas to receive a minimum depth of 6" of clean topsoil (per note below).
- Topsoil shall be: screened existing stockpiled topsoil, existing in-place soil, or screened soil from an off-site source that will support plant growth, and meets the following requirements. Clean topsoil shall be free of rocks, coarse fragments, gravel, sticks, trash, roots, debris over 3/4" and any substances harmful to plant growth. It also must be free of plants or plant parts of any noxious weeds. Topsoil shall contain 3 to 5 percent decomposed organic matter and a pH between 5.5 and 7.0.
- Planting beds and parking lot islands: Landscape contractor is responsible for ensuring that unwanted material (gravel, debris, roots and other extraneous material harmful to plant growth) has been removed from the topsoil and for the fine grading of all landscaped areas. The fine grading of planting beds and parking lot islands may require additional topsoil to bring to finish grade, allowing for mulch depth. Crown all planting islands and planting beds not adjacent to buildings, a minimum of 6" to provide proper drainage, unless otherwise specified. All other finished landscaped areas to be smooth, uniform and provide positive drainage away from structures and pavement.
- Seeded areas: to receive a settled minimum depth of 6" of blended, prepared and non-compacted topsoil. Landscape contractor is responsible for excavation and removal of unwanted material (gravel, debris, roots and other extraneous material harmful to plant growth) to the specified depth, supplementing with additional topsoil (if necessary) and the fine grading of all seeded areas.
- Tree planting (see planting detail): plant all trees slightly higher than finished grade at root flare. Remove excess soil from top of root ball, if needed. An auger is not an acceptable method of digging tree planting holes. Scarify side walls of tree pit prior to installation. Once tree has been placed into the hole, is at the correct depth and vertical alignment and will no longer be moved, brace root ball by tamping soil around the lower portion of the root ball. Remove and discard twine / rope, burlap and support wire from the sides of root ball. Backfill pit with 75% existing soil removed from excavation and 25% compost blended prior to backfilling holes, in six-inch lifts. Lightly tamp each lift using foot pressure or hand tools to settle backfill, support the tree and eliminate voids. Do not over compact or use mechanical or pneumatic tamping equipment. Discard any gravel, heavy clay or stones. When hole has been backfilled to three-quarters of its depth, pour water around the root ball and allow to soak into soil to settle the soil. Continue backfilling until soil is brought to grade level.  
Provide a 3" deep, 4 ft. diameter shredded hardwood bark mulch ring around all trees in lawn areas, reduced to 1" deep on top of root ball. Keep mulch 3"-5" away from trunk of tree. Trees that are installed incorrectly will be replaced at the time and expense of the landscape contractor. Trees too large for two people to lift in and out of holes, shall be placed with sling. Do not rock the trees in holes to raise them.
- Shrub planting (see planting detail): all shrubs to be pocket planted with a mix of 75% existing soil removed from excavation and 25% compost, blended prior to backfilling holes. When hole is two-thirds full, shrubs shall be watered thoroughly and water left to soak in before proceeding.
- Mulching: all tree and shrub planting beds to receive a 3" deep layer of high-quality shredded hardwood bark mulch (not enviromulch or wood chips). Mulch shall be uniform in size, color, quality and overall appearance. Mulch shall be free of debris, large wood chunks, soil, rocks, weeds, invasive plant parts or seeds and any other material injurious to plant growth. All perennial and ornamental grass planting areas to receive a 2" layer and groundcover areas a 1-2" layer of the same mulch. Do not mulch annual flower beds (if applicable). Do not allow mulch to contact plant stems and tree trunks.
- Edging: edge all planting beds with a 4" deep spaded edge (shovel cut or mechanical). Bedlines are to be cut crisp, as per plan. A clean definition between lawn area and plant bed is required.
- Plant bed preparation: the soil in all perennial, ornamental grass, annual and groundcover areas shall be amended with compost prior to plant installation. Spread a 2" layer of compost (per note below) on top of clean topsoil and rototill to a depth of approximately 8".
- Compost shall be stable, and weed-free organic matter. It shall be resistant to further decomposition and free of compounds, such as ammonia and organic acids, in concentrations toxic to plant growth. The compost shall contain no pathogens or other chemical contaminants and meet the requirements of WisDNR S100 Compost Specification.
- Lawn installation for all seeded turfgrass areas: remove / kill off any existing unwanted vegetation prior to seeding. Prepare the topsoil and seed bed by removing all surface stones 1" or larger and grading lawn areas to finish grade. Apply a starter fertilizer and specified seed, ensure good seed to soil contact, and provide mulch covering suitable to germinate and establish turf. Provide seed and fertilizer mix information to general contractor prior to installation. Erosion control measures are to be used in swales and on steep grades, where applicable. Methods of installation may vary at the discretion of the landscape contractor on his/her responsibility to establish and guarantee a smooth, uniform, quality turf. If straw mulch is used as a mulch covering, a tackifier may be necessary to avoid wind damage. Marsh hay containing reed canary grass is not acceptable as a mulch covering.  
An acceptable quality turf is defined as having no more than 5% of the total area with bare spots larger than 1/2 square foot and uniform coverage throughout all turf areas.
- Seed mix for lawn areas - use only a premium quality seed mix. Premium blend seed mix (or equivalent): 50% blended bluegrass, 25% creeping red fescue, 25% perennial rye applied at 5 lbs per 1,000 SF or at recommended rates from supplier. Provide seed specifications to general contractor prior to installation.
- Lawn installation for all sodded turfgrass areas: remove / kill off any existing unwanted vegetation prior to sodding. Prepare the topsoil and sod bed by removing all surface stones 1" or larger and grading lawn areas to finish grade, allowing for thickness of sod. Use only premium sod blend according to TPI (revised 1995) and ASPA standards. Install sod uniformly with staggered joints, laid tightly end to end and side to side. Roll sod with a walk behind roller and water immediately upon installation to a 3" depth. Stake any sod installed on steep slopes or in swales, etc. Landscape contractor is responsible to provide a smooth, uniform, healthy turf. Landscape contractor shall repair and re-sod any eroded, sunken or bare spots (larger than 1/2 square foot) until acceptance by owner.
- The landscape contractor is responsible for the watering and maintenance of all landscape areas at time of planting and throughout construction until the substantial completion of the installation and acceptance by the owner. This includes all trees, shrubs, evergreens, perennials, ornamental grasses, and seeded turf grass areas. Maintenance includes mowing, weeding, watering, mulching, edging, pruning, deadheading, raking leaves / debris, sweeping up grass clippings, fertilizing and maintaining turf areas (including applying pre and post emergent herbicides), and any other needs that are required to keep the landscape healthy and well maintained.
- Substantial Completion of Landscape: after the landscape has been installed, the landscape contractor is responsible to conduct a final review with the owner's representative and the general contractor to ensure that all plans and specifications have been met. After this review, the landscape will be considered to be installed in substantial completion unless otherwise noted by the owner's representative and/or general contractor. Any items missing or incomplete, shall be corrected within 30 days. The landscape contractor shall provide written watering and maintenance instructions for the new plantings and lawn to the owner.
- Warranty and replacements: All plants (trees, evergreens, shrubs, perennials, ornamental grasses and groundcovers) shall be warranted by the landscape contractor to be in healthy and flourishing condition for a period of one year from the date of substantial completion. This assumes the owner performs required maintenance (i.e. regular watering) after substantial completion of the landscape. Only one replacement per plant will be required during the warranty period, except for losses or replacements due to failure to comply with specified requirements. Replacements shall be plants of the same variety specified on the plan and closely match adjacent specimens in size. The landscape contractor is responsible for keeping a documented record of which plants have been replaced during the warranty period.

#11	100"	131"	87"	113"	71"	92"	24"

- Vertical bars; and horizontal or diagonal bars with less than 12" of concrete placed below them.
- Horizontal or diagonal bars with 12" or more of concrete placed below them. (eg. wall horizontals)
- Use f<sub>c</sub> = 3000 psi values for masonry rebar laps. Do not lap splice bars bigger than #8 in masonry. Break off fins in cores of 6" CMU.
- For epoxy coated bars, multiply these values x 1.20.
- For laps between different bar sizes, use the greater of these values based on the smaller bar, or these values based on the bigger bar divided by 1.30.
- Hoop bar laps shall be staggered such that splices do not overlap with bars above, below, or on opposite faces.

Project Owner

**LOCK SEAM DETAIL**  
NOT TO SCALE

MANUFACTURE LOCK SEAM WITH 1/8" O-RING SEAM SEALANT WITHIN HEL-COR LOCK SEAM

**CONSTRUCTION LOADING DIAGRAM**  
NOT TO SCALE

**CONSTRUCTION LOADS**

FOR TEMPORARY CONSTRUCTION VEHICLE LOADS, AN EXTRA AMOUNT OF COMPACTED COVER MAY BE REQUIRED OVER THE TOP OF THE PIPE. THE HEIGHT-OF-COVER SHALL MEET THE MINIMUM REQUIREMENTS SHOWN IN THE TABLE BELOW. THE USE OF HEAVY CONSTRUCTION EQUIPMENT NECESSITATES GREATER PROTECTION FOR THE PIPE THAN FINISHED GRADE COVER MINIMUMS FOR NORMAL HIGHWAY TRAFFIC.

PIPE SPAN INCHES	AXLE LOADS (kips)			
	16-50	50-75	75-110	110-150
	MINIMUM COVER (FT)			
12-42	2.0	2.5	3.0	3.0
48-72	3.0	3.0	3.5	4.0
78-120	3.0	3.5	4.0	4.0
126-144	3.5	4.0	4.5	4.5

MINIMUM COVER MAY VARY, DEPENDING ON LOCAL CONDITIONS. THE CONTRACTOR MUST PROVIDE THE ADDITIONAL COVER REQUIRED TO AVOID DAMAGE TO THE PIPE. MINIMUM COVER IS MEASURED FROM THE TOP OF THE PIPE TO THE TOP OF THE MAINTAINED CONSTRUCTION ROADWAY SURFACE.

**CONSTRUCTION LOADING DIAGRAM**  
NOT TO SCALE

**SPECIFICATION FOR CORRUGATED STEEL PIPE-ALUMINIZED TYPE 2 STEEL**

**SCOPE**

THIS SPECIFICATION COVERS THE MANUFACTURE AND INSTALLATION OF THE CORRUGATED STEEL PIPE (CSP) DETAILED IN THE PROJECT PLANS.

**MATERIAL**

THE ALUMINIZED TYPE 2 STEEL COILS SHALL CONFORM TO THE APPLICABLE REQUIREMENTS OF AASHTO M274 OR ASTM A669.

**PIPE**

THE CSP SHALL BE MANUFACTURED IN ACCORDANCE WITH THE APPLICABLE REQUIREMENTS OF AASHTO M58 OR ASTM A760. THE PIPE SIZES, GAGES AND CORRUGATIONS SHALL BE AS SHOWN ON THE PROJECT PLANS.

ALL FABRICATION OF THE PRODUCT SHALL OCCUR WITHIN THE UNITED STATES.

**HANDLING AND ASSEMBLY**

SHALL BE IN ACCORDANCE WITH RECOMMENDATIONS OF THE NATIONAL CORRUGATED STEEL PIPE ASSOCIATION (NCSIPA).

**INSTALLATION**

SHALL BE IN ACCORDANCE WITH AASHTO STANDARD SPECIFICATIONS FOR HIGHWAY BRIDGES, SECTION 26, DIVISION II OR ASTM A798 AND IN CONFORMANCE WITH THE PROJECT PLANS AND SPECIFICATIONS. IF THERE ARE ANY INCONSISTENCIES OR CONFLICTS THE CONTRACTOR SHOULD DISCUSS AND RESOLVE WITH THE SITE ENGINEER.

IT IS ALWAYS THE RESPONSIBILITY OF THE CONTRACTOR TO FOLLOW OSHA GUIDELINES FOR SAFE PRACTICES.

ANTI-FLOTATION PROVISIONS DUE TO HIGH GROUNDWATER OR OTHER FLOTATION CONCERNS ARE SITE-SPECIFIC DESIGN CONSIDERATIONS AND SHALL BE SPECIFIED BY ENGINEER OF RECORD.

**MATERIAL SPECIFICATION**  
NOT TO SCALE

Project Owner

DIAMETER, D	MIN. COVER	CORR. PROFILE
6"-10"	12"	1 1/2" x 1/4"
12"-48"	12"	2 2/3" x 1/2"
>48"-96"	12"	3" x 1", 5" x 1"
>96"	D8	3" x 1", 6" x 1"

- STRUCTURAL BACKFILL MUST EXTEND TO LIMITS OF THE TABLE
- TOTAL HEIGHT OF COMPACTED COVER FOR CONVENTIONAL HIGHWAY LOADS IS MEASURED FROM TOP OF PIPE TO BOTTOM OF FLEXIBLE PAVEMENT OR TOP OF RIGID PAVEMENT
- ULTRAFLO ALSO AVAILABLE FOR SIZES 18" - 120" WITH 3/4" x 3/4" x 7 1/2" CORRUGATION

**INSTALLATION NOTES**

- WHEN PLACING THE FIRST LIFTS OF BACKFILL IT IS IMPORTANT TO MAKE SURE THAT THE BACKFILL IS PROPERLY COMPACTED UNDER AND AROUND THE PIPE HAUNCHES.
- OTHER ALTERNATE BACKFILL MATERIAL MAY BE ALLOWED DEPENDING ON SITE SPECIFIC CONDITIONS, AS APPROVED BY SITE ENGINEER.
- BACKFILL USING CONTROLLED LOW-STRENGTH MATERIAL (CLSM, "FLASH FILL" OR "FLOWABLE FILL") MAY BE USED WHEN THE SPACING BETWEEN THE PIPES WILL NOT ALLOW FOR PLACEMENT AND ADEQUATE COMPACTION OF THE BACKFILL. CONTACT CONTECH FOR FURTHER EVALUATION.
- IF SALTING AGENTS FOR SNOW AND ICE REMOVAL ARE USED ON OR NEAR THE PROJECT, A GEOMEMBRANE BARRIER IS RECOMMENDED OVER THE UPPER HALF OF THE PIPE. THE GEOMEMBRANE LINER IS INTENDED TO HELP PROTECT THE SYSTEM FROM THE POTENTIAL ADVERSE EFFECTS THAT MAY RESULT FROM A CHANGE IN THE SURROUNDING ENVIRONMENT OVER A PERIOD OF TIME. PLEASE REFER TO THE CORRUGATED METAL PIPE DETENTION DESIGN GUIDE FOR ADDITIONAL INFORMATION.

MATERIAL LOCATION	MATERIAL SPECIFICATION	DESCRIPTION
1 FILL ENVELOPE WIDTH	PER ENGINEER OF RECORD	MINIMUM TRENCH WIDTH MUST ALLOW ROOM FOR PROPER COMPACTION OF HAUNCH MATERIALS UNDER THE PIPE. THE SUGGESTED MINIMUM TRENCH WIDTH, OR EOR RECOMMENDATION: PIPE ≤ 12": D + 16" PIPE > 12": 1.5D + 12"
2 FOUNDATION	AASHTO 26.5.2 OR PER ENGINEER OF RECORD	PRIOR TO PLACING THE BEDDING, THE FOUNDATION MUST BE CONSTRUCTED TO A UNIFORM AND STABLE GRADE. IN THE EVENT THAT UNSUITABLE FOUNDATION MATERIALS ARE ENCOUNTERED DURING EXCAVATION, THEY SHALL BE REMOVED AND FOUNDATION BROUGHT BACK TO GRADE WITH A FILL MATERIAL APPROVED BY THE ENGINEER OF RECORD.
3 BEDDING	AASHTO M 43: 3, 357, 4, 467, 5, 56, 57 (APPROVED REGIONAL EQUIVALENTS INCLUDE CA-7)	ENGINEER OF RECORD TO DETERMINE IF BEDDING IS REQUIRED. PIPE MAY BE PLACED ON THE TRENCH BOTTOM OF A RELATIVELY LOOSE, NATIVE SUITABLE WELL GRADED GRANULAR MATERIAL THAT IS ROUGHLY SHAPED TO FIT THE BOTTOM OF THE PIPE, 2" MIN DEPTH. THE BEDDING MATERIAL MAY BE SUITABLE FOUNDATION SOILS CONFORMING TO AASHTO SOIL CLASSIFICATIONS A1, A2, OR A3 WITH MAXIMUM PARTICLE SIZE OF 3" PER AASHTO 26.3.8.1
4		CORRUGATED METAL PIPE
5A CRITICAL BACKFILL	AASHTO M 145: A-1, A-2, A-3 *	HAUNCH ZONE MATERIAL SHALL BE HAND SHOVELED OR SHOVEL SLICED INTO PLACE TO ALLOW FOR PROPER COMPACTION WITHOUT SOFT SPOTS. BACKFILL SHALL BE PLACED IN 8" +/- LOOSE LIFTS AND COMPACTED TO 90% STANDARD PROCTOR PER AASHTO 199. BACKFILL SHALL BE PLACED SUCH THAT THERE IS NO MORE THAN A THREE LIFT (24") DIFFERENTIAL BETWEEN ANY OF THE PIPES AT ANY TIME DURING THE BACKFILL PROCESS. THE BACKFILL SHOULD BE ADVANCED ALONG THE LENGTH OF THE SYSTEM TO AVOID DIFFERENTIAL LOADINGS.
5B BACKFILL	AASHTO M 145: A-1, A-2, A-3	WELL GRADED GRANULAR MATERIAL WHICH MAY CONTAIN SMALL AMOUNTS OF SILT OR CLAY AND MAXIMUM PARTICLE SIZE OF 3" (PER AASHTO 26.3.8.1 AND 12.4-1.3).
6 COVER MATERIAL	UP TO MIN. COVER - SEE 5A AND 5B ABOVE ABOVE MIN. COVER - PER ENGINEER OF RECORD	COVER MATERIAL MAY INCLUDE NON-BITUMINOUS, GRANULAR ROAD BASE MATERIAL WITHIN MIN COVER LIMITS
7 RIGID OR FLEXIBLE PAVEMENT (IF APPLICABLE)	PER ENGINEER OF RECORD	FLEXIBLE PAVEMENT SHOULD NOT BE COUNTED AS PART OF THE FILL HEIGHT OVER THE CMP. FINAL BACKFILL MATERIAL SELECTION AND COMPACTION REQUIREMENTS SHALL FOLLOW THE PROJECT PLANS AND SPECIFICATIONS PER THE ENGINEER OF RECORD.
8A OPTIONAL SIDE GEOTEXTILE	SEE DESCRIPTION	WHERE STONE BACKFILL IS USED, GEOTEXTILE IS RECOMMENDED TO BE PLACED ON ALL SIDES BETWEEN STONE AND OTHER MATERIAL.
8B OPTIONAL GEOTEXTILE BETWEEN LAYERS	SEE DESCRIPTION	IF SOIL TYPES DIFFER AT ANY POINT ABOVE PIPE INVERT, A GEOTEXTILE LAYER IS RECOMMENDED TO BE PLACED BETWEEN THE LAYERS TO PREVENT SOIL MIGRATION.

**NOTES:**

- FOR MULTIPLE BARREL INSTALLATIONS, THE RECOMMENDED STANDARD SPACING BETWEEN PARALLEL PIPE RUNS SHALL BE THE PIPE DIAMETER / 2 BUT NO LESS THAN 12" FOR DIAMETERS < 72". FOR 72" AND LARGER DIAMETERS, THE MINIMUM SPACING IS 36". CONTACT YOUR CONTECH REPRESENTATIVE FOR NONSTANDARD SPACING.
- APPROVED REGIONAL EQUIVALENTS FOR SECTION 5A INCLUDE CA-7, CDDOT #67, MIDOT 20, 34G, OR 21AA STONE OR GRAVEL; #8; #57; MIDOT 6A, 2G, 3G, 34G.

**MANUFACTURER RECOMMENDED BACKFILL**  
NOT TO SCALE

**PLAIN END CMP RISER PIPE**

GENERAL NOTES:

- DELIVERED BAND STYLE AND FASTENER TYPE MAY VARY BY FABRICATION PLANT.
- JOINT IS TO BE ASSEMBLED PER AASHTO BRIDGE CONSTRUCTION SPECIFICATION SEC 26.4.2.4.
- BAND MATERIAL AND GAGE TO BE SAME AS RISER MATERIAL.
- IF RISER HAS A HEIGHT OF COVER OF 10' OR MORE, USE A SLIP JOINT.
- BANDS ARE NORMALLY FURNISHED AS FOLLOWS:
  - 12" THRU 48" 1-PIECE
  - 54" 2-PIECES
- ALL RISER JOINT COMPONENTS WILL BE FIELD ASSEMBLED.
- MANHOLE RISERS IN APPLICATIONS WHERE TRAFFIC LOADS ARE IMPOSED REQUIRE SPECIAL DESIGN CONSIDERATIONS.
- DIMENSIONS SUBJECT TO MANUFACTURING TOLERANCES.

**12" RISER BAND DETAIL**  
NOT TO SCALE

**2 2/3"x1 1/2" RE-ROLLED END HEL-COR PIPE**

GENERAL NOTES:

- JOINT IS TO BE ASSEMBLED PER AASHTO BRIDGE CONSTRUCTION SPECIFICATION SEC 26.4.2.4.
- BAND MATERIALS AND/OR COATING CAN VARY BY LOCATION. CONTACT YOUR CONTECH REPRESENTATIVE FOR AVAILABILITY.
- BANDS ARE SHAPED TO MATCH THE PIPE-ARCH WHEN APPLICABLE.
- BANDS ARE NORMALLY FURNISHED AS FOLLOWS:
  - 12" THRU 48" 1-PIECE
  - 54" THRU 96" 2-PIECES
  - 102" THRU 144" 3-PIECES
- BAND FASTENERS ARE ATTACHED WITH SPOT WELDS, RIVETS OR HAND WELDS.
- ALL CMP IS REROLLED TO HAVE ANNULAR END CORRUGATIONS OF 2 2/3"x1 1/2"
- DIMENSIONS ARE SUBJECT TO MANUFACTURING TOLERANCES.
- ORDER SHALL DESIGNATE GASKET OPTION, IF REQUIRED (SEE DETAILS ABOVE).

## GENERAL LANDSCAPE NOTES

- Contractor responsible for contacting public and private underground utility locating service to have site marked prior to any digging or earthwork.
- Contractor to verify all plant quantities shown on plant list and verify with plan. Report any discrepancies immediately to general contractor.
- All plantings shall comply with standards as described in American Standard of Nursery Stock - ANSI Z60.1 (latest version). General contractor or owner's representative reserves the right to inspect and potentially reject any plants that are inferior, compromised, undersized, diseased, improperly transported, installed incorrectly or damaged.
- Any potential plant substitutions must be submitted in writing to the general contractor and approved by the owner's representative or landscape architect prior to installation. All plants must be installed as per sizes and quantities shown on plant material schedule, unless approved by the owner's representative or landscape architect. Any potential changes to sizes shown on plan and appropriate cost credits / adjustments must be submitted in writing to the general contractor and approved by the owner's representative or landscape architect prior to installation.
- The subsequent requirements regarding topsoil should be coordinated between the general contractor, grading contractor and landscape contractor.
- Subgrade areas shall be graded to within 1", more or less, of proposed subgrade. Deviations shall not be consistent in one direction.
- Topsoil shall be placed to meet proposed finished grade. Planting islands to be backfilled with clean topsoil free of debris (per note below) to a minimum depth of 18" by general / grading contractor to insure long term plant health. All other landscaped areas to receive a minimum depth of 6" of clean topsoil (per note below).
- Topsoil shall be: screened existing stockpiled topsoil, existing in-place soil, or screened soil from an off-site source that will support plant growth, and meets the following requirements. Clean topsoil shall be free of rocks, coarse fragments, gravel, sticks, trash, roots, debris over 3/4" and any substances harmful to plant growth. It also must be free of plants or plant parts of any noxious weeds. Topsoil shall contain 3 to 5 percent decomposed organic matter and a pH between 5.5 and 7.0.
- Planting beds and parking lot islands: Landscape contractor is responsible for ensuring that unwanted material (gravel, debris, roots and other extraneous material harmful to plant growth) has been removed from the topsoil and for the fine grading of all landscaped areas. The fine grading of planting beds and parking lot islands may require additional topsoil to bring to finish grade, allowing for mulch depth. Crown all planting islands and planting beds not adjacent to buildings, a minimum of 6" to provide proper drainage, unless otherwise specified. All other finished landscaped areas to be smooth, uniform and provide positive drainage away from structures and pavement.
- Seeded areas: to receive a settled minimum depth of 6" of blended, prepared and non-compacted topsoil. Landscape contractor is responsible for excavation and removal of unwanted material (gravel, debris, roots and other extraneous material harmful to plant growth) to the specified depth, supplementing with additional topsoil (if necessary) and the fine grading of all seeded areas.
- Tree planting (see planting detail): plant all trees slightly higher than finished grade at root flare. Remove excess soil from top of root ball, if needed. An auger is not an acceptable method of digging tree planting holes. Scarify side walls of tree pit prior to installation. Once tree has been placed into the hole, is at the correct depth and vertical alignment and will no longer be moved, brace root ball by tamping soil around the lower portion of the root ball. Remove and discard twine / rope, burlap and support wire from the sides of root ball. Backfill pit with 75% existing soil removed from excavation and 25% compost blended prior to backfilling holes, in six-inch lifts. Lightly tamp each lift using foot pressure or hand tools to settle backfill, support the tree and eliminate voids. Do not over compact or use mechanical or pneumatic tamping equipment. Discard any gravel, heavy clay or stones. When hole has been backfilled to three-quarters of its depth, pour water around the root ball and allow to soak into soil to settle the soil. Continue backfilling until soil is brought to grade level.  
Provide a 3" deep, 4 ft. diameter shredded hardwood bark mulch ring around all trees in lawn areas, reduced to 1" deep on top of root ball. Keep mulch 3"-5" away from trunk of tree. Trees that are installed incorrectly will be replaced at the time and expense of the landscape contractor. Trees too large for two people to lift in and out of holes, shall be placed with sling. Do not rock the trees in holes to raise them.
- Shrub planting (see planting detail): all shrubs to be pocket planted with a mix of 75% existing soil removed from excavation and 25% compost, blended prior to backfilling holes. When hole is two-thirds full, shrubs shall be watered thoroughly and water left to soak in before proceeding.
- Mulching: all tree and shrub planting beds to receive a 3" deep layer of high-quality shredded hardwood bark mulch (not enviromulch or wood chips). Mulch shall be uniform in size, color, quality and overall appearance. Mulch shall be free of debris, large wood chunks, soil, rocks, weeds, invasive plant parts or seeds and any other material injurious to plant growth. All perennial and ornamental grass planting areas to receive a 2" layer and groundcover areas a 1-2" layer of the same mulch. Do not mulch annual flower beds (if applicable). Do not allow mulch to contact plant stems and tree trunks.
- Edging: edge all planting beds with a 4" deep spaded edge (shovel cut or mechanical). Bedlines are to be cut crisp, as per plan. A clean definition between lawn area and plant bed is required.
- Plant bed preparation: the soil in all perennial, ornamental grass, annual and groundcover areas shall be amended with compost prior to plant installation. Spread a 2" layer of compost (per note below) on top of clean topsoil and rototill to a depth of approximately 8".
- Compost shall be stable, and weed-free organic matter. It shall be resistant to further decomposition and free of compounds, such as ammonia and organic acids, in concentrations toxic to plant growth. The compost shall contain no pathogens or other chemical contaminants and meet the requirements of WisDNR S100 Compost Specification.
- Lawn installation for all seeded turfgrass areas: remove / kill off any existing unwanted vegetation prior to seeding. Prepare the topsoil and seed bed by removing all surface stones 1" or larger and grading lawn areas to finish grade. Apply a starter fertilizer and specified seed, ensure good seed to soil contact, and provide mulch covering suitable to germinate and establish turf. Provide seed and fertilizer mix information to general contractor prior to installation. Erosion control measures are to be used in swales and on steep grades, where applicable. Methods of installation may vary at the discretion of the landscape contractor on his/her responsibility to establish and guarantee a smooth, uniform, quality turf. If straw mulch is used as a mulch covering, a tackifier may be necessary to avoid wind damage. Marsh hay containing reed canary grass is not acceptable as a mulch covering.  
An acceptable quality turf is defined as having no more than 5% of the total area with bare spots larger than 1/2 square foot and uniform coverage throughout all turf areas.
- Seed mix for lawn areas - use only a premium quality seed mix. Premium blend seed mix (or equivalent): 50% blended bluegrass, 25% creeping red fescue, 25% perennial rye applied at 5 lbs per 1,000 SF or at recommended rates from supplier. Provide seed specifications to general contractor prior to installation.
- Lawn installation for all sodded turfgrass areas: remove / kill off any existing unwanted vegetation prior to sodding. Prepare the topsoil and sod bed by removing all surface stones 1" or larger and grading lawn areas to finish grade, allowing for thickness of sod. Use only premium sod blend according to TPI (revised 1995) and ASPA standards. Install sod uniformly with staggered joints, laid tightly end to end and side to side. Roll sod with a walk behind roller and water immediately upon installation to a 3" depth. Stake any sod installed on steep slopes or in swales, etc. Landscape contractor is responsible to provide a smooth, uniform, healthy turf. Landscape contractor shall repair and re-sod any eroded, sunken or bare spots (larger than 1/2 square foot) until acceptance by owner.
- The landscape contractor is responsible for the watering and maintenance of all landscape areas at time of planting and throughout construction until the substantial completion of the installation and acceptance by the owner. This includes all trees, shrubs, evergreens, perennials, ornamental grasses, and seeded turf grass areas. Maintenance includes mowing, weeding, watering, mulching, edging, pruning, deadheading, raking leaves / debris, sweeping up grass clippings, fertilizing and maintaining turf areas (including applying pre and post emergent herbicides), and any other needs that are required to keep the landscape healthy and well maintained.
- Substantial Completion of Landscape: after the landscape has been installed, the landscape contractor is responsible to conduct a final review with the owner's representative and the general contractor to ensure that all plans and specifications have been met. After this review, the landscape will be considered to be installed in substantial completion unless otherwise noted by the owner's representative and/or general contractor. Any items missing or incomplete, shall be corrected within 30 days. The landscape contractor shall provide written watering and maintenance instructions for the new plantings and lawn to the owner.
- Warranty and replacements: All plants (trees, evergreens, shrubs, perennials, ornamental grasses and groundcovers) shall be warranted by the landscape contractor to be in healthy and flourishing condition for a period of one year from the date of substantial completion. This assumes the owner performs required maintenance (i.e. regular watering) after substantial completion of the landscape. Only one replacement per plant will be required during the warranty period, except for losses or replacements due to failure to comply with specified requirements. Replacements shall be plants of the same variety specified on the plan and closely match adjacent specimens in size. The landscape contractor is responsible for keeping a documented record of which plants have been replaced during the warranty period.

# V.OF PLOVER ENGINEER REPORT

submitted May 15, 2026

## DESIGN PROJECTS

### STH 54 Parallel Sanitary Interceptor

---

2/27/26: Design is complete. Project is being held open until project is let for bid by WisDOT.

5/15/26: WisDOT has requested the submittal of a utility permit application. This permit is not part of the design scope, but there is some design budget left, so the permit and accompanying environmental checklist was prepared, reviewed by Village staff, and submitted to the DOT 5/14/2026. At Lyle's request, the DNR sewer extension permit is also in the process of being prepared.

### Technical Specifications

---

2/2/26: Work has started on the Plover Technical Specifications project. An index is being created that is organized and numbered as a hybrid of WisDOT and APWA. When the index is complete, it will be reviewed by Village department heads before work continues.

2/27/26: The index is drafted and is being reviewed prior to forwarding to Village department heads.

3/12/26: The index has been forwarded to Village department heads for comment.

4/10/26: Department head comments have been received. Content work will continue.

5/15/26: No new information to report

## CONSTRUCTION PROJECTS

### Green Tree Farms subdivision

---

4/10/26: A preconstruction meeting was held March 30. Construction is anticipated to start mid-April. DNR NOI permits have been received, so clearing and grading work can proceed. Sanitary and water permits are pending. Plan updates to address Village comments are still pending.

5/15/26: Contractor is clearing the site. AECOM field staff have set some survey control points. No utility materials are yet on site.

## DEVELOPMENT PROJECTS

### MULLINS CHEESE

---

10/10/25: We are expecting updated utility and stormwater plans due to the decision not to vacate a portion of Corporate Ave.

**5/15/26: No new information to report**

### Empire Estates

---

2/2/26: Utility plans were submitted on 1/9/26 and stormwater plans were submitted on 1/16/26. Plans have been reviewed. A conditional recommendation to accept plans for both the utilities and stormwater plans was sent to Village staff and the development team on 2/2/2026. Conditions include minor adjustments to the utilities and some clarifications on the stormwater plan. A task order for construction services is being developed, anticipating start of construction mid-April.

2/27/26: Due to the developer pausing requests for approval, the task order development for construction services has been paused.

3/12/26: Updated plans have been submitted and comments have been satisfied.

4/10/26: A task order for construction inspection services has been submitted. The developer has put the project on HOLD for the time being.

**5/15/26: No new information to report**

### Green Tree Farm

---

2/2/26: The developer submitted plans for a pre-submittal review on 12/15/25. Utility and stormwater plans were submitted on 1/19/26 for review. Those plans are currently under review.

2/27/26: Plans have been reviewed and comments for revisions submitted to the developer. A task order for construction services is being developed, including the inspection of stormwater management features at the developer's request.

3/12/26: Plans have been resubmitted for review. A task order for construction observation has been submitted.

4/10/26: Utility and stormwater plans have a few minor issues that need to be addressed.

**5/15/26: No new information to report**

## Portage County Facility

---

8/29/25: A preliminary concept plan has been received for review

9/12/25: Some additional preliminary plan information has been received. Providing sanitary sewer will require some evaluation and direction. Some high-level cost estimates and location of sanitary sewer as compared to Plover's sanitary sewer master plan have been discussed between AECOM engineers and Village staff. A preliminary review meeting was facilitated by Village staff on 9/10/25.

4/10/26: Updated civil/site plans have been submitted for review. Village staff met on March 30 to discuss with the County and their engineers. An aggressive design/construction calendar for utility work has been proposed.

5/15/26: No new information to report

## Warner & Warner

---

5/15/26: A commercial development is proposed at the SE corner of Corporate Ave and Precision Drive. Plans were received on 5/1 and AECOM was directed to conduct a stormwater plan review on 5/4. Plan review can take up to 30 days, but upon request to expedite we were able to review and provide comments on 5/14. The comments are relatively minor and resubmittal should not cause significant redesign or delays.

## Empire Square

---

5/15/26: A commercial development is proposed at the SW corner of Post Rd and Plover Rd. The developer met for a pre-development meeting back in January and on 5/8/26 submitted site and stormwater plans. Plan review is underway.

## GENERAL

### Other

---

1/16/26: Review of State regulations pertaining to planning and consideration of future ice control brine storage.

4/10/26: SPRINGVILLE DAM - The Wisconsin Department of Natural Resources (DNR) has issued its response to the 2025 inspection of the Springville Dam (see attached letter). Although the inspection did

**not** identify any operational or maintenance problems, and no issues were noted beyond normal routine upkeep, the DNR has assigned the dam a “**Poor**” rating. Their rating is based on what they describe as “uncertainties with embankment stability and internal erosion during both normal and higher-than-normal water conditions.”

In addition, the DNR is now requiring the Village to complete a **Potential Failure Mode Analysis (PFMA)**. This analysis is intended to evaluate the possibility of internal erosion or instability related to seepage at bolt holes and joints in the outlet structure.

It is important to note the following:

- The bolt-hole leakage observed after construction **was repaired** by the contractor in 2024 by sealing the holes with grout.
- Minor joint seepage **was expected** with the current box-culvert style outlet structure. This structure was not part of the original design; it was redesigned at the direction of the Wisconsin Department of Transportation to allow phased construction.
- Box-culvert joints are known to allow some seepage. To safely manage this, **filter fabric** was installed at the joints to let clean water pass through while preventing soil movement and erosion.
- The surrounding native soils are highly permeable, and the design includes **two clay seepage collars** around the outlet structure to prevent water from traveling along the outside of the structure.

PFMAs are normally required only for dams regulated by the **Federal Energy Regulatory Commission (FERC)**. The Springville Dam is **not federally regulated**, and state-regulated dams are instead required to follow Wisconsin **NR 333** rules. There is **no language in NR 333**, nor any known state administrative rule, that requires or authorizes the DNR to mandate a PFMA for state-regulated dams.

The Village already has all required state-approved documents in place, including:

- A **Dam Failure Analysis (DFA)**
- An **Emergency Action Plan (EAP)**
- An **Inspection, Operation, and Maintenance Plan (IOM)**

To be proactive and as agreed to between the Village and the DNR, the Village is also conducting **monthly inspections**—in addition to the normal every-other-year cycle—to monitor seepage for any signs of sediment movement related to joint seepage in the outfall structure. **No sediment has ever been observed** at any seepage location.

The Village has contacted the DNR to request:

1. An explanation of what evidence suggests that any internal or external erosion may be occurring,
2. Examples of PFMA reports for other state-regulated dams, and
3. A meeting with DNR staff to discuss the basis for their concerns.

5/01/26: Springville Dam - A meeting date has been tentatively set to meet with the DNR for Thursday, June 4 at 10:00 am.

5/15/26: No new information to report
